Marcin Włodarski, Project Manager, Actia Forum

Other topics & next project meetings – open discussion  
Activity 1. Next steps; Meeting in Brussels;  
CEF & other LNG opportunities, next meeting

### Port of Helsingborg

LNG liquefaction plant in the Port of Helsingborg

Investment activity planned in the Port of Helsingborg aims at a new liquefaction plant, a storage horizontal pressure steel tank and a filling station for tank trucks. The Activity will launch fuelling services for vessels and vehicles in the adjacent areas.

### Port of Klaipėda

LNG Reloading Station by Klaipėdos Nafta

Klaipėdos nafta will implement a multipurpose and publicly accessible LNG reloading station that will be connected to the Floating Storage and Regasification Unit – a large scale LNG terminal via a mobile multifunctional refuelling station for transport purposes.
